

MOLYKOTE - Speciality Lubricants for Textile Processing House			
Machinery	Components	Key requirements	MOLYKOTE product
Stenter Machine	Stenter chains	High Temperature	Oil Lubrication Molykote HT Chain Oil (IN)
		No Carbon deposition	
		Good wear protection	
		No evaporation	
		PFPE based	
		High temperature stability	
		Double the life performance	
	Width adjustment screws	Dry Lubricant	Grease Lubrication Molykote HP-500 / Molykote G-8101
		No fluff accumulation	
Increased lubrication intervals			
Blower motor fan bearings	High temperature	Molykote Polyurea 3 (IN)	
	Long life, low equipment downtime		
Compactor Machine	Chain lubrication	No Carbon deposition	Molykote HT Chain Oil (IN)
		Good wear protection	
		No evaporation	
Merceriser Machine	Bearings	Excellent performance in Caustic environment	Molykote G - 6000
		Strong Chemical resistance	
		High oxidation resistance / Long life	
Dyeing & Processing machines	Anti Friction Bearings	Multipurpose	Molykote Multilub (IN)
	Electric Motors, Fans	Moderate speed / High temperature	Molykote Polyurea 3 (IN)
	Water contact area	Good adhesion, Water resistance	Molykote G-0102 / BR2+ (IN) grease
General Maintenance	Threaded connection	Anti seize exposed to High temperature	Molykote 1000 anti seize paste
	O rings, Gasgets & Seals	No cracks	Molykote G 5511
		No Swelling	
		Good sealing	
	Electrical contacts	Fast evaporation	Molykote S-1002 spray
		No residue cleaner	
	Rust loosener	Good penetration	Molykote Supergliss spray
	Rust preventer		
ID & FD Fan bearings	For High speed & High load	Molykote BR 2+ (IN) grease	
Rust Prevention coating on machine surfaces	Cold Galvanising spray in easy to apply spray form	Molykote L-0500
